

Calling all Water & Wastewater Operators, Superintendents and Engineers....This advanced, HDPE-oriented, FREE webinar is for you

HDPE Pipe Total Solutions Webinar

“HDPE: Tough Enough for Above Ground Applications”

Wednesday, October 4, 2023
2 PM EST

Online via ZOOM

Advanced Registration Required.

To register for Wednesday go to:

https://us06web.zoom.us/webinar/register/WN_97ieKm2NQJC6Em_xMjAAAQ

- Access to national HDPE experts
- Content from our highly successful roadshow events in a webinar format
- CEU or PDH available (dependent on your state's requirements)
- Session lasts 75 minutes

HDPE: Tough Enough for Above Ground Applications

HDPE has been used for various above ground applications for decades without a second thought. As municipal water and wastewater adoption continues its dramatic rise, more and more design engineers are evaluating HDPE for use in above ground applications, both temporary and permanent conditions. This webinar will present a brief history of uses of HDPE in non-municipal markets and provide examples of recent uses of HDPE in municipal above ground applications. Case studies as well as engineering data analysis will be provided.

In this session, we will cover:

- Historical use of HDPE above ground
- Temporary and Permanent use considerations
- Municipal case studies for above ground use
- Engineering analysis of thermal effects
- Thermal expansion
- Restraint options
- Use Cases
- Engineering Tips
- Lessons learned

Featured Speakers: Stephen Boros, Pipeline Plastics, Chris Weight, SECOR, Alan Ambler, Alliance for PE Pipe

Advanced Registration Required.
