YOUR HDPE RESOURCES

Join us as we continue development of our successful webinar program, with the first in a new series of HDPE webinars sponsored by the Alliance for PE Pipe, which will kick off by introducing trenchless technology projects that have pushed the limits of installation capabilities with resounding success. These projects include larger diameters, larger lengths and installations that repurpose existing pipelines that haven't been used in decades. The HDPE industry continues to innovate and refine its resin, product offerings and applications for municipal markets while reinforcing the technical understanding of installations.
