

OPEN CUT WEBINAR

Wednesday, March 6th
2:00 PM EST

WANT TO LEARN MORE
OPEN CUT AND HDPE?

**THIS ADVANCED, HDPE-
ORIENTED, FREE SHOW IS
FOR YOU!**

- Access to national HDPE experts
- Content from our highly successful roadshow events in a webinar format
- CEU/PDH available (dependent on your state's requirements)
- Session lasts 75 minutes

ONLINE VIA ZOOM

HDPE is increasing in popularity for installation in municipal water and wastewater systems. HDPE has been widely used for trenchless technology installations, such as HDD, pipe bursting and sliplining. Installation of HDPE through open cut construction is increasing as municipal use of the material continues to grow. Pipe installation references provide typical design parameters as to where extensive design analysis is not required. Some installations fall outside of these parameters and this session will highlight those requirements and their equations necessary to perform the analysis.

The last time we addressed this topic was in 2022. We will have experts on hand to answer your questions on this topic or others during the webinar. Think of these sessions as "Office Hours." Sign up at www.pepipe.org.

Technical Note - The pre-show HDPE Technical Note will address the importance of training, what is involved and how to access training in the HDPE industry. Paul Brodsky from McElroy Manufacturing will be our guest speaker. Technical Notes are pre show events, sometimes live, other times taped where the speaker introduces a subject important for all that use HDPE pipe to understand.

Advanced Registration Required.
