WEBINAR SUMMARY

This a classic Webinar session where the two major plastic pipes are compared one vs the other. Strengths and weaknesses of each will be explored with the priority being design considerations for each and lessons learned. Attention to the subtleties of each and how they are alike and different we will be presented. Bring your questions so that we can make the talk interactive. We will have numerous experts on hand to answer all HDPE questions. This program is 75 minutes and will begin with a 7 minute technical note before the hour

Advanced Registration Required.
