WEBINAR SUMMARY

This is a first time we have presented this content in a webinar format. Learn from municipal engineers on how and why they chose HDPE pipe for their water system and what lessons they have learned along the way. We will hear from three different municipal engineers from across the country. The speakers will include Jared Svagera from Omaha MUD and Richard Brand from East Windsor MUA in NJ. Both of these engineers will discuss their experiences in both adopting HDPE pipe and using it for a period of several years. The opening few minutes will cover basic municipal engineering for utilities. Join us ten minutes before the show for some pre show content. Sign up at the usual place <https://pepipe.org/events/>

Advanced Registration Required.
