WEBINAR SUMMARY

Join the PE Alliance as they cover the basics as well as the nuances of an HDPE pipeline inspection. The priority of the conversation will be on fusion inspection, but the entire pipe string inspection will be covered. Ten minutes will also be devoted to pipe string pressure testing. This is the first time for this presentation so it will be thorough and it will include some other industry experts. Join us ten minutes before the show for some pre show content. Sign up at the usual place <https://pepipe.org/events/>

Advanced Registration Required.
