WEBINAR SUMMARY

"Connections, Services and Pressure Testing," addresses the myriad of ways to connect smaller diameter services to HDPE pressure or gravity mains. The HDPE industry has endeavored to develop many different types of connections to HDPE large and small diameters to provide many options to match the municipal water and wastewater markets. How to perform a pressure test in the field will also be detailed and explained. This webinar will include: mechanical connections, repair options, Electrofusion saddles, tapping strategies, self tapping tees, MJ adapters and more. This webinar is graciously sponsored by Richard Kolasa at WL Plastics and Rusty Reeves at Core & Main. Lets hear it for Rusty and Richard. Thank you guys! Sign up at www.pepipe.org.

Advanced Registration Required.
