## WEBINAR SUMMARY

The Alliance has spoken about large diameter and XXL projects for three years now on this webinar program. Recent developments have allowed the industry to manufacture 54" DR 11 pipe for use in transmission and large volume wastewater applications. We will feature two recent projects where 54" DR 11 was used and one 32" slip lining job where a failing concrete line was lined with HDPE pipe. Guests will learn about designing with HDPE pipe in these diameters, issues seen with pipe handling and particularly attention will be paid to construction and installation issues.

**Advanced Registration Required.**
