WEBINAR SUMMARY

The first in a series of HDPE webinars sponsored by the Alliance for PE Pipe will kick off by providing an in depth analysis of all resources for designing your own HDPE project. This webinar will provide detailed information on formulas, behavior, surge calculations, Manning's coefficient, C-factor and water hammer. It will also address pipe type comparisons and installation methods and things to look out for during design and construction. After you listen to this professional presentation, you will have a much better grasp on HDPE drawing sets, specs, connections, pipe behavior and issues from the field than you ever imagined. This promises to be the best 75 minutes you have spent on HDPE in your career! Sign up now!

Moderator: Peter Dyke, Executive Director, Alliance for PE Pipe

Speakers: Alan Ambler, PE; AM Trenchless; Douglas Keller; LyondellBasell; Richard Kolasa WL Plastics; Rusty Reeves Core and Main; Taylor Holladay, Modern Polymer.

- Access to national HDPE experts
- Content from our highly successful roadshow events in a webinar format
- CEU/PDH available (dependent on your state's requirements)
- Session lasts 75 minutes

Advanced Registration Required.
