

HDPE Fusion Training

March 10th – 13th 2025

The PE Alliance has teamed up with Milford to bring fusion training to this part of the Lone Star state. In order to build a steady stream of fusion techs in central Texas, Electrofusion and butt fusion will be covered during the 4 days of training. These sessions are offered a la carte

Details

Intended for municipal staff, contractors, and consulting engineering firms, this training week is offered by the PE Alliance at a discounted rate thanks to sponsorships from our friends at McElroy, Milford and Integrity Fusion. These sessions are offered a la carte. A limited number of scholarships are also available for those in need. For more info, contact Peter Dyke @ pdyke@pepipe.org
