WEBINAR SUMMARY

Fundamental learning for the curious pipeline designer defines this important annual PEA webinar topic. We could also call this one, "What every HDPE design engineer should read." The team will discuss the most often cited HDPE research, documents, technical notes, standards and practices and why they are important to the industry. While you may not need to read them for yourself, it is the wise designer or owner that familiarizes herself with these resources. We may not show a lot of videos during this session, but this content remains "required reading" for the novice and intermediate design engineers and owner operators. CEU/PDH offered, just stay until the end and respond to the question.

Moderator: Peter Dyke, Executive Director, Alliance for PE Pipe

Speakers: Dan Landy, Alliance for PE Pipe, Stephen Boros, Pipeline Plastics, Richard Kolasa, WL Plastics

Advanced Registration Required.
