WEBINAR SUMMARY

Last year the PE Alliance processed close to 1000 inquiries ranging from simple questions on dimension ratio and modulus of elasticity to complex engineering consultation for a long run HDD river crossings. So we see inquiries requiring little time and even more challenging questions needing hours of study. We selected the top ten most important and frequent questions with a few honorable mentions which we will share along the way. This session will appeal to anyone involved in the design or management of municipal pipe systems. CEU/PDH offered, just stay until the end and respond to the question.

- **Moderator:** Peter Dyke, Executive Director, Alliance for PE Pipe
- **Speakers:** Alan Ambler PE, Alliance for PE Pipe, Matthew Danysh, AGRU, Dan Landy, Alliance for PE Pipe, Brian Swanson PE, Alliance for PE Pipe
