WEBINAR SUMMARY

Casing pipes are not uncommon in all types of piping systems. Rehabilitation of a pipeline via sliplining project required an existing pipeline to serve as a conduit or "casing." In addition to sliplines, new installs often include an AHJ mandating a casing pipe, particularly when crossing interstates, railroads, and similar. Join this webinar to learn best practices of designing with HDPE and casing pipes. Topics covered include allowable pull force, external pressure allowances, spacers, grouting, pipe deflection and more. CEU/PDH offered, just stay until the end and respond to the question.

- **Moderator:** Alan Ambler PE, Chief Engineer, Alliance for PE Pipe
- **Speakers:** John Trimble SECOR, Dusty Langston WL Plastics, Brian Dorwart Brierly Associates
- **Sponsored by:** SECOR
